

Vermont Public Television and Vermont EPSCoR team up to bring you this engaging new TV series about Vermonters involved in cutting-edge scientific inquiry - Vermonters at the frontiers of science.

Episodes

Regenerating Our Future: The little skate, a North Atlantic sea creature resembling a ray, has captured scientists' attention for its incredible regenerative abilities.

Cyber Shadows: As the popularity of social media grows, so does the interest in mining online data for a variety of uses

Out of This World: Space exploration is happening right under our noses, even in Vermont. With the space shuttle program now ended, scientists at four Vermont institutions are leading the way to cheaper methods of space exploration, constructing a miniature satellite destined to orbit the moon.

3 Great Ways for Teachers to Get Involved!

1. Access the series and materials online at <http://www.vpt.org/emergingscience>
2. Participate in a collaborative “mini-workshop” over the LNV (register below)
3. Attend an interactive discussion over the LNV with Vermont experts (dates TBD)

LNV Mini-Workshops

February 7th (Cyber Shadows) February 15th (Out of this World) March 12th (Regeneration)
