Acknowledgement

The Department of Education expresses its appreciation to the school officials, architects, the legislative and interagency task force on school facility standards, and all other individuals who have contributed to the contents of this document.

The Vermont Department of Education does not discriminate on the basis of race, color, national origin, creed, marital status, sex, disability, age or sexual orientation in its programs or activities.

SCHOOL BOARDS AND ADMINISTRATORS

This is a joint publication of the agencies of state government with responsibilities relating to school buildings and sites. Its purpose is to provide information to those involved in a school construction project. The contents are relevant to the construction of a new school, school addition, or alterations to an existing school that increase its program or enrollment capacity, or ensures that it remains a safe and healthy place for students, faculty and community members. The contents may only be partially applicable for school construction related to other purposes. *Use the Department of Education as a resource throughout the construction process.*

The Department acknowledges and appreciates the contributions to this publication by the different agencies with rules that affect school construction. *Our intent is to provide general guidance as to how to plan for school construction projects and secure necessary state approvals, but this is not a step-by-step manual.*
