

COFFEE AND CONVERSATIONS

SESSION TWO

4 MARCH 2020

- Overview
- Identifying Priority Problems of Practice
- Root Cause Analysis

HOSTS

- Vermont AOE
 - Patrick Halladay, Director, Education Quality Division
 - Lori Dolezal, AOE Continuous Improvement Coach
 - Donna Stafford, AOE Continuous Improvement Coach
 - Josh Souliere, Asst. Director, Education Quality Division
 - Kevin Doering, Education Quality Coordinator
 - Toni Marra, Education Quality Coordinator
 - Marianna Charalabopoulos, Education Quality Coordinator
- National Partners
 - Evangeline Ambat, Education Development Center
 - David Blumenthal, American Institutes for Research

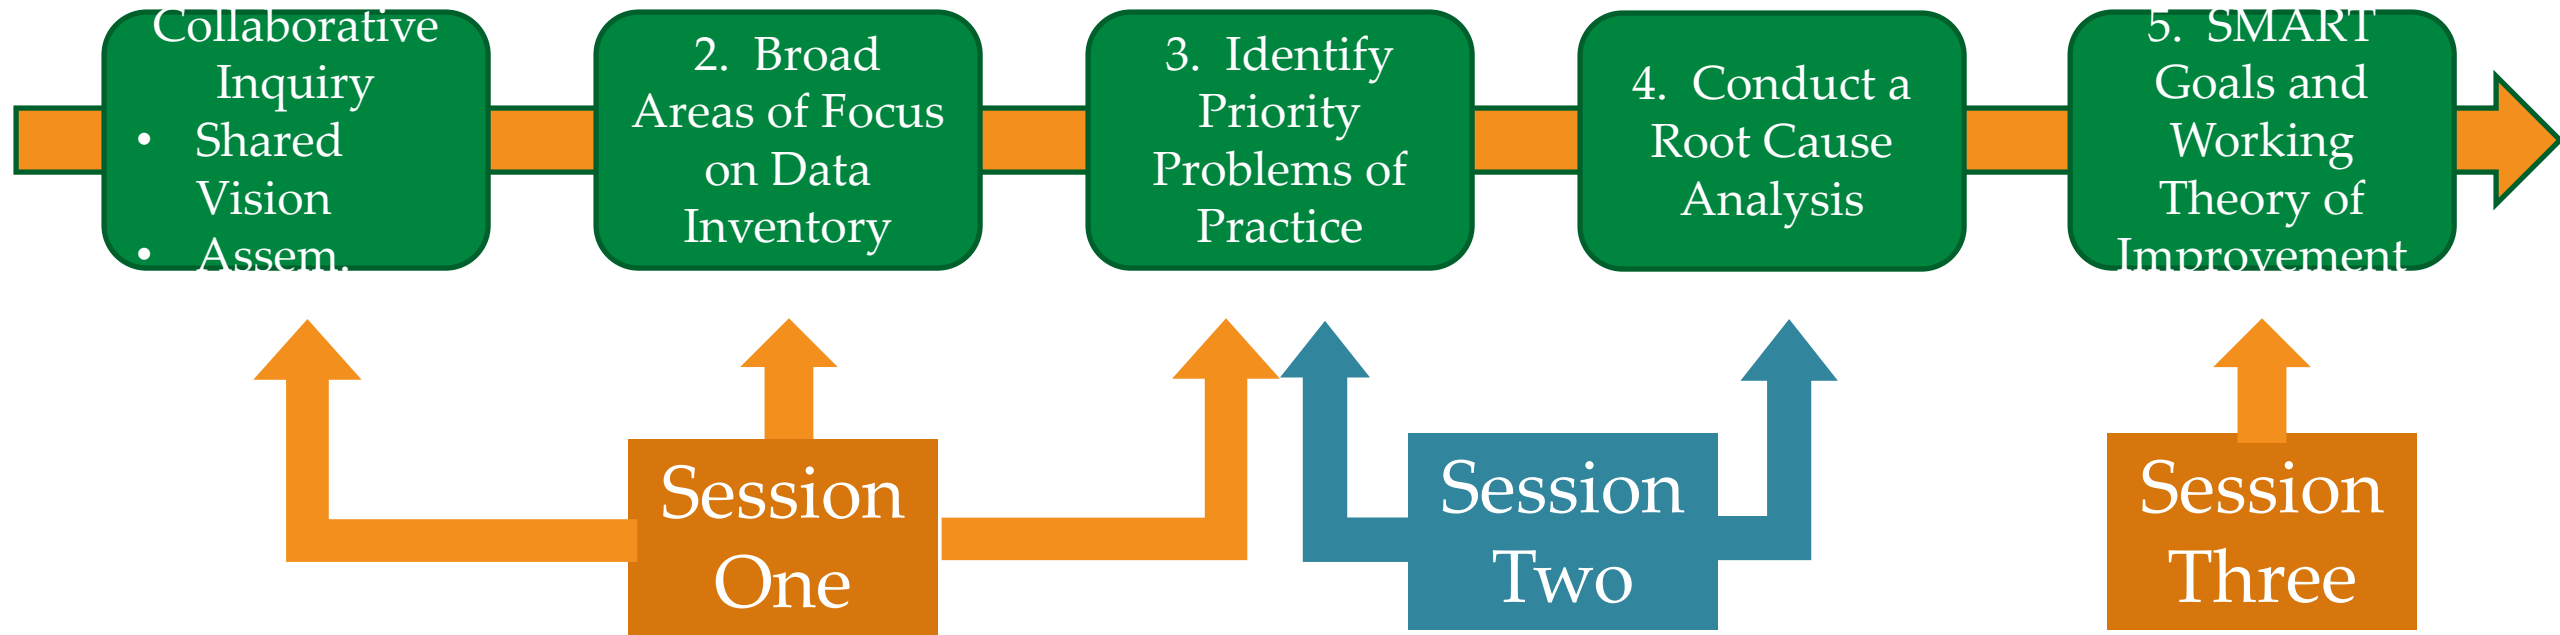

GO TO WEBINAR

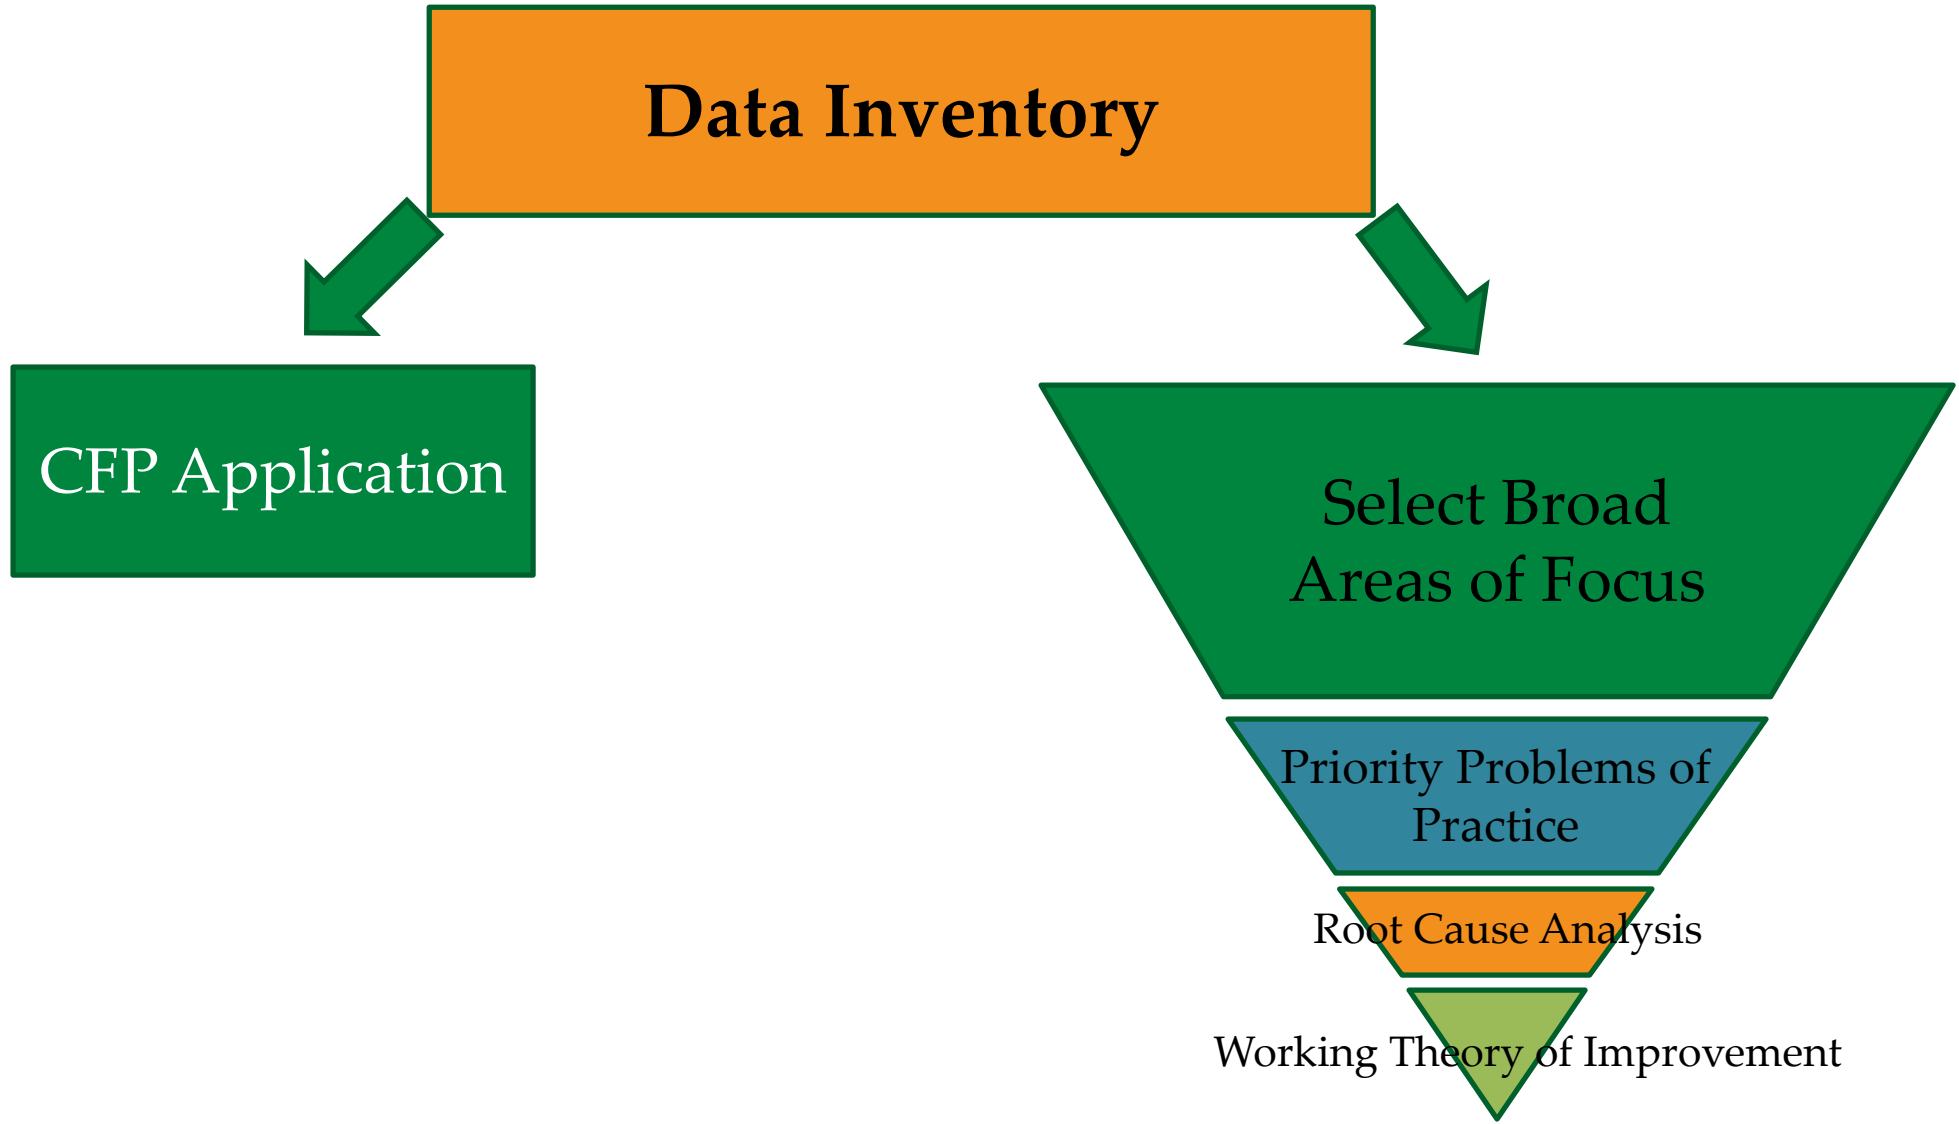

- Question Tab
- Chat Tab
- Raise Hand
- (Un)Mute

OVERVIEW

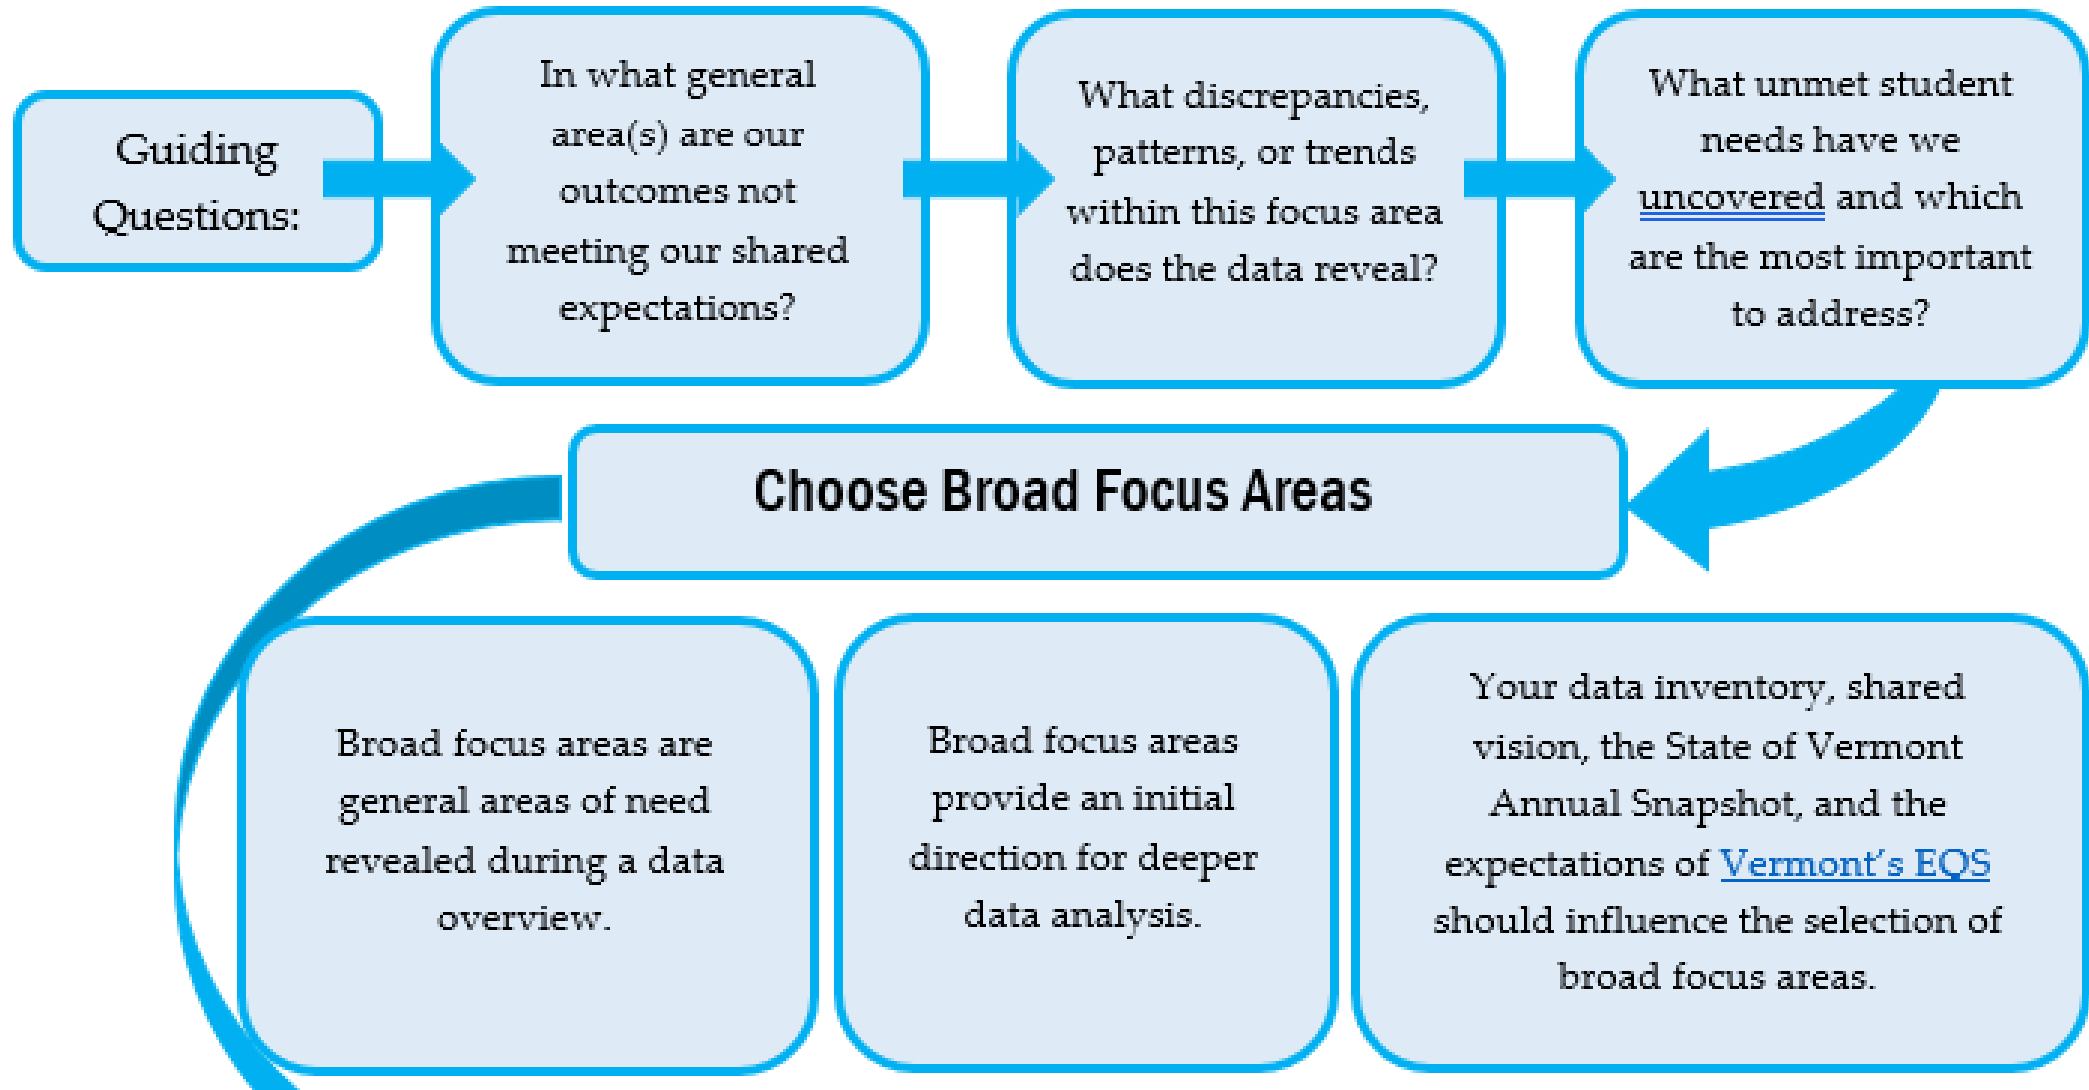

IDENTIFY PRIORITY PROBLEMS OF PRACTICE

```
graph TD; A[Recognize Trends in the Data] --> B[With a focus area agreed upon, a further examination of the data occurs in three steps:]; B --> C[1. Recognize Trends in the Data

With a focus area agreed upon, a further examination of the data occurs in three steps:

1. The team identifies and collects additional data related to this area as needed.

2. The team makes factual observations about the data and only states what the data shows.

3. Once the team has a clear picture of the facts revealed by the data, you move on to making inferences about what the facts are telling you.

Identify Priority Problems of Practice

Once enough data has been collected, observations made, and inferences drawn, a tentative conclusion can be made.

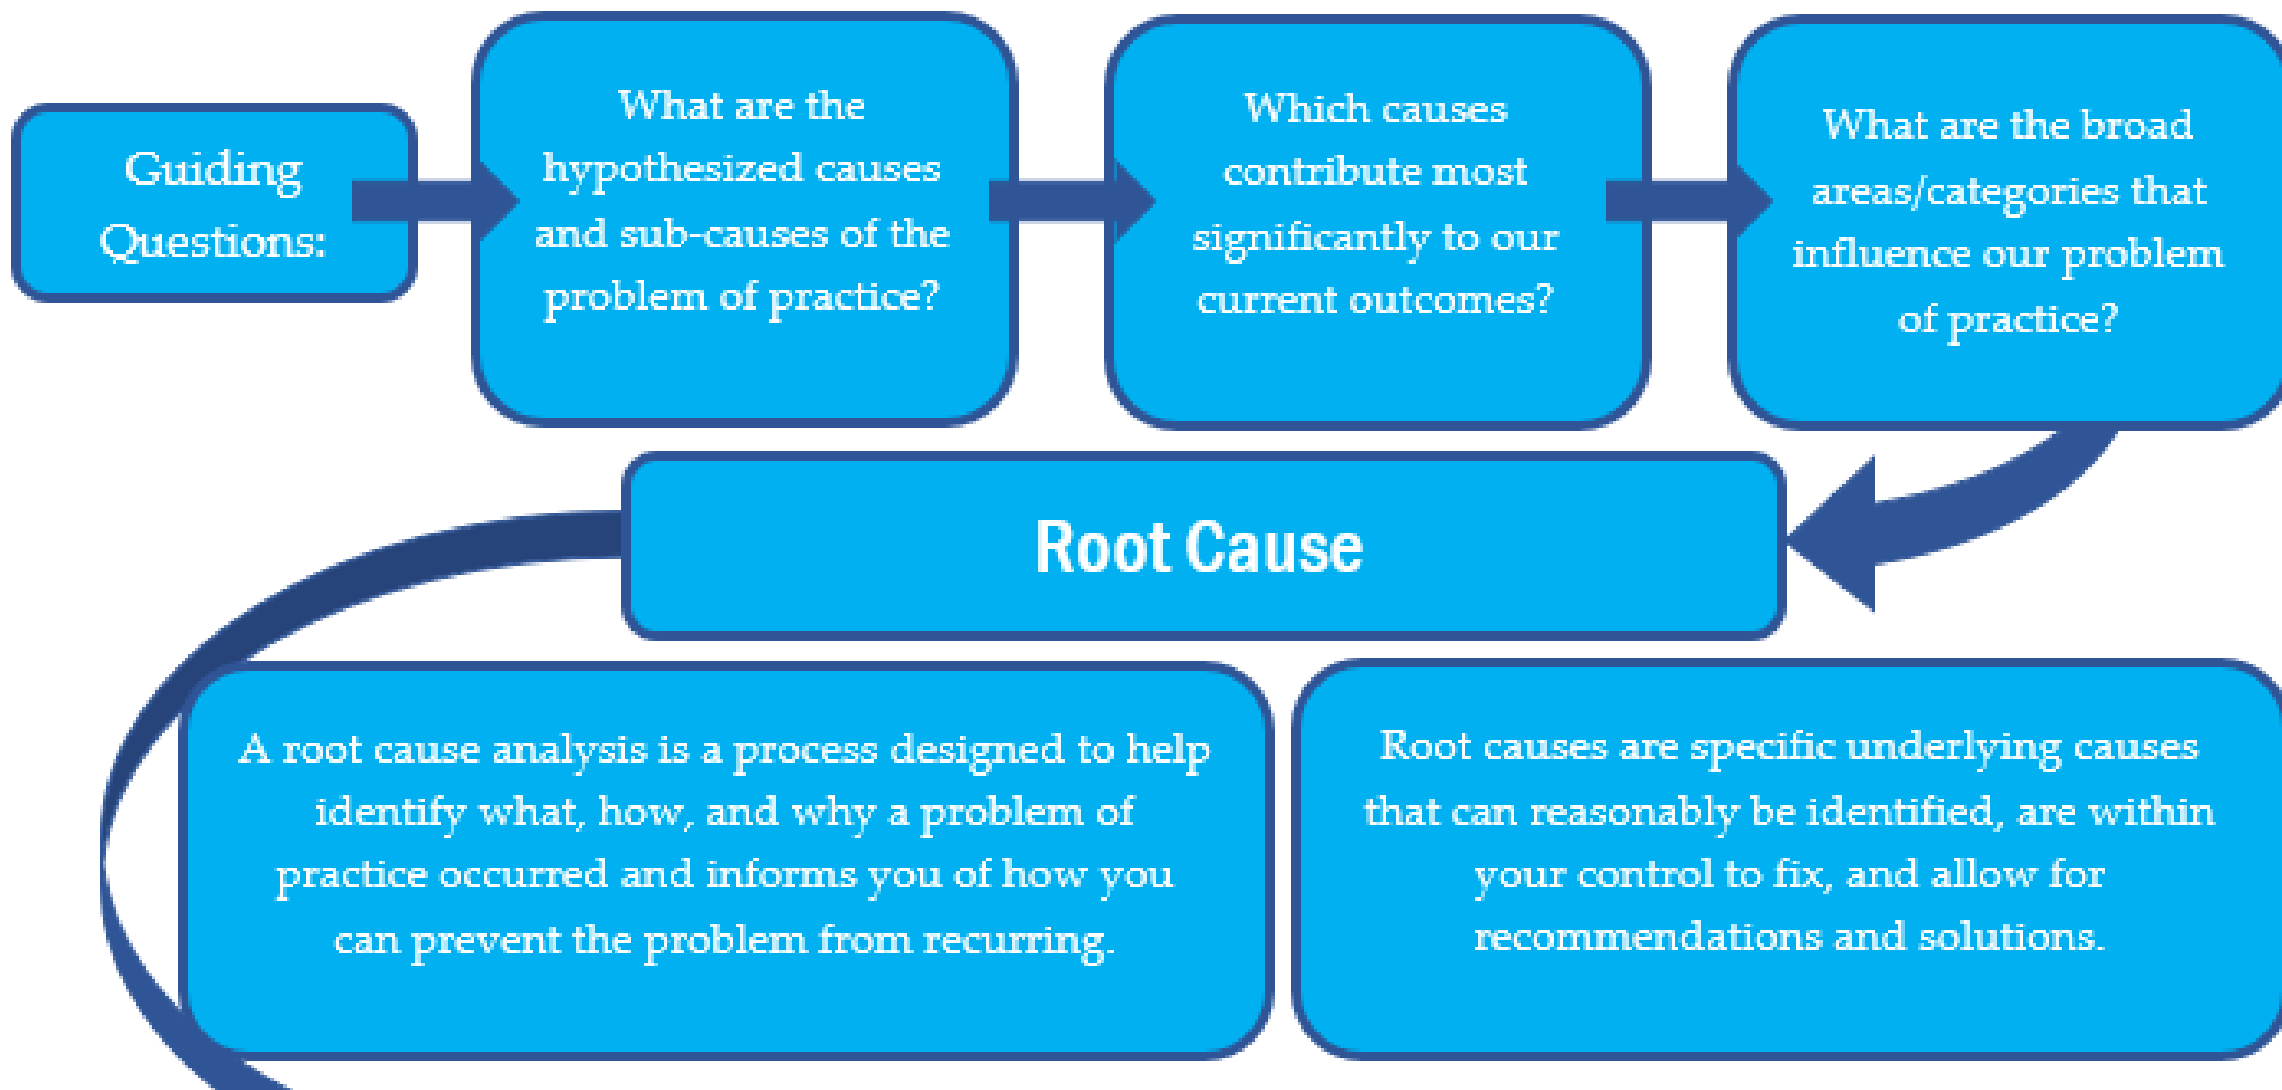

This conclusion becomes a problem of practice—a hypothesis that has enough evidence supporting it to merit further analysis.

A problem of practice may be revised as new data is explored and insights are gained.

ROOT CAUSE ANALYSIS

Fishbone Diagram

A fishbone diagram, also known as a cause and effect diagram, is a graphic tool used to examine possible root cause(s) of a certain effect or problem of practice.

Causes directly influence the outcome or goal of an improvement project whether as part of the system or outside of it. There are many causes that contribute to an effect or problem.

Recommended categories of causes:

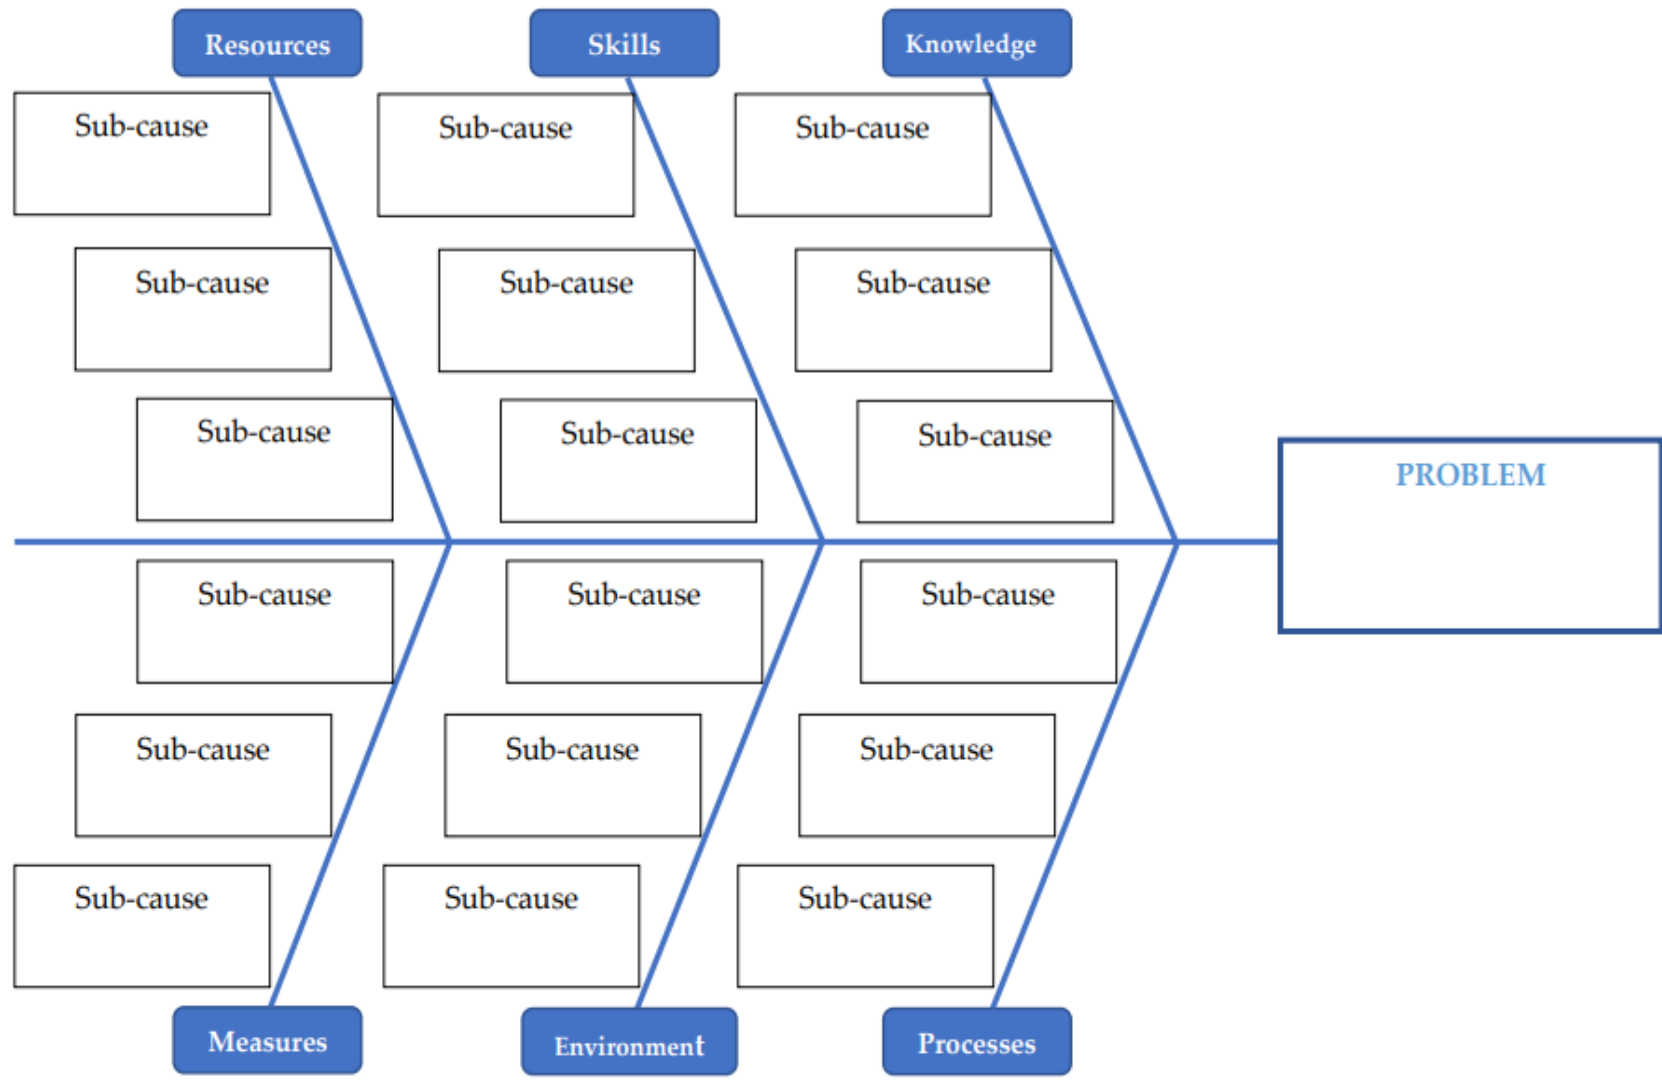

- Resources
- Skills
- Knowledge
- Measures/Data
- Environment
- Processes

The Five-Whys

The Five-Whys is a brainstorming tool that can help teams identify the root cause(s) of a problem.

Select one problem of practice that has been identified, ask "why" questions to reach the specific root cause(s). Use data to support your reasoning.

Teams will know they have reached a root cause when they have identified a reason that is within their control to address and, if when the identified cause is addressed, it will most likely result in the problem going away.

TIMELINE

- 15 February—CIP application window opened
- 1 April—CFP application window opens
- 30 June—CFP application submitted for substantial approval to obligate funds at the start of the fiscal year
- CIP must be approved in order to have CFP approved

NEXT STEPS AND RESOURCES

- Session Three: Planning and Testing Change Ideas
 - 11 March, 2:00-3:00pm
- Data Inventory with sample: <https://education.vermont.gov/documents/cfp-cip-data-inventory>
- Comprehensive Needs Toolkit: <https://education.vermont.gov/documents/edu-comprehensive-needs-assessment-toolkit>
- FAQ: Coming Soon!
