ECSE Resource Spotlight

Adaptations & Teaching Practices in STEM (From STEMIE OSEP TA Center)

All children can engage in STEM learning. With intentionality and the use of appropriate adaptations and teaching strategies, adults (e.g., family members, practitioners) can facilitate and/or individualize STEM learning and experiences within daily routines and the environment.

- A Guide to Teaching Practices
- A Guide to Adaptations

Preschoolers with Visual Impairments and Additional Disabilities: Using Universal Design for Learning and Differentiation

This [article from the Division for Early Childhood’s (DEC) Young Exceptional Children](http://example.com) focuses on strategies including UDL and collaboration with other professionals to support preschoolers with visual impairments access meaningfully in visual or auditory, and tactile information. Drs. Deborah Chen and Jamie Dote-Kwan share examples and strategies on how to consider children’s interest, sensory abilities and preferences, as well as adaptations and modifications to the materials, activities, and instruction to ensure all children, especially those with visual impairments can fully engage and participate within classroom routines and activities. This article can be downloaded for free until May 1, 2022.
Storybook Conversations in STEM with Young Children with Visual Impairments

In partnership with Kansas Deaf-Blind Project at Kansas State School for the Blind, STEMIE developed two video demonstrations on engaging young children with visual impairments in storybook conversations using Pat Hutchins’ Rosie’s Walk (2022). The video offers a look at how to prepare children for a shared book reading experience. The book offers an opportunity for children to learn about spatial and positional concepts. While the demonstrated strategies are effective for children with visual impairments, they are also useful for sighted children. Learn about practical strategies and tools for dialogic reading with young children with significant disabilities including those who are blind, visually impaired, or deaf-blind in this archived STEMIEFest 2021 session by the Kansas Deaf-Blind project and Kansas State School for the Blind.

ECSE Webinars and Community of Practices

The Early Education Team is providing free virtual webinars and communities of practice on early childhood special education topics throughout the 2021-2022 School Year. Resources on previous and current topics, including a fluid Q and A document, can be found on the ECSE Padlet.

- The ECSE Community of Practice (COP) on the topic of Early MTSS will be held on Wednesday, April 6 at 2:30 pm.
- The April ECSE Webinar and Community of Practice will focus on the DEC Recommended Practices which provide guidance to practitioners and families about the most effective way to improve the learning outcomes and promote the development of young children, birth through age 5, who have or at risk for developmental delays or disabilities.
Call in and online links for upcoming webinars are posted below.
