## Vermont 2015-16 Assessment Results Released

BARRE - Secretary of Education Rebecca Holcombe announced today statewide results from the 2015-16 Smarter Balanced Assessments, a set of computer adaptive English language arts and mathematics tests developed by a national consortium currently made up of 15 states, the U.S. Virgin Islands, and the Bureau of Indian Education. This was the second year Vermont students participated in the Smarter Balanced program.

These tests, which were administered this spring to students in grades three through eight and grade 11, provide results aligned with the Common Core State Standards. Over time, the results will provide teachers and parents with an increasingly reliable and accurate snapshot of how their children are performing in English Language Arts and Mathematics, and will offer community members throughout the state a common measure for evaluating the success of schools, both locally and statewide.

Vermont's statewide results:

| $2016$ <br> Smarter <br> Balanced <br> Math <br> Results | Total <br> Proficient and Above | Scale Score |  | 2016 Smarter <br> Balanced English Language Arts Results | Total Proficient and Above | Scale Score |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Proficient Score | State Average |  |  | Proficient Score | State Average |
| Grade 3 | 55.84\% | 2436 | 2442 | Grade 3 | 53.84\% | 2432 | 2438 |
| Grade 4 | 49.89\% | 2485 | 2482 | Grade 4 | 53.76\% | 2473 | 2477 |
| Grade 5 | 43.31\% | 2528 | 2509 | Grade 5 | 58.16\% | 2502 | 2515 |
| Grade 6 | 40.94\% | 2552 | 2522 | Grade 6 | 56.20\% | 2531 | 2539 |
| Grade 7 | 46.04\% | 2567 | 2548 | Grade 7 | 57.57\% | 2552 | 2562 |
| Grade 8 | 43.87\% | 2586 | 2564 | Grade 8 | 58.52\% | 2567 | 2580 |
| Grade 11 | 37.76\% | 2628 | 2581 | Grade 11 | 57.22\% | 2583 | 2598 |

[^0]use mathematics. These results reinforce our commitment to finding strategies that will help us eliminate these gaps in achievement. If we raise the performance of our lower performing students, more students will graduate with the strong skills they need to create, innovate and power our Vermont businesses and economy into the future. "

Although this is the second year the Smarter Balanced Assessments have been administered in Vermont, the Agency of Education is encouraging schools to consider this year's results as the baseline for determining progress over time.
"When we administered the Smarter Balanced tests for the first time last year, Vermont's students and teachers had very little experience with taking tests on computer, " said Michael Hock, Agency of Education Test Director. "For that reason we want to treat the 2014-15 administration as a pilot test, and use those results with considerable caution."

The test scores released today establish a baseline aligned with the Common Core standards, and as such, should not be compared to previous statewide test scores including the 2014-15 Smarter Balanced scores.

The Smarter Balanced Assessments, which challenge students to apply their knowledge and skills in areas such as critical thinking, analytical writing and problem solving, are computer adaptive tests, administered online. Computer adaptive tests adjust the difficulty of the test question based on how a test taker responds to each successive question. If a student answers incorrectly, for example, the computer delivers a slightly easier question. If the student answers correctly, the next question is a bit harder. This process continues until the best possible prediction of a student's ability is determined. This means very few children take a test that feels too hard or too easy. It also means the test can provide a more precise measure of what students can and cannot do.

Individual school data will be released at a press conference during the week of September 19, 2016. The Agency has compiled several tools to help the public interpret these results. For more information visit the AOE website.

[^0]:    "These scores are one measure by which we and our schools can assess the impact of our shared efforts to help students learn better," Secretary Holcombe said. "The proficiency thresholds are intentionally ambitious and give us a baseline to track our progress moving forward. Our children from more prosperous families continue to rank near the top nationally. Our most vulnerable youth- those living in poverty, with disabilities, from marginalized populations and who speak English as a second language (see chart at end) - continue to have test scores that are on average lower than our general population. Although we hesitate to draw major conclusions from only one measure, we know that literacy and numeracy are first steps to improved life outcomes for all students. Children can't thrive independently in life beyond school if they can't read, write and
