

## Proficiency-Based Learning Glossary

### **Act 77**

[Act 77](#) became law in July of 2013, and can be seen as the result of many years of work on the part of many Vermont citizens, educators, and policy-makers to create a policy environment designed to foster a system of public education in which every student graduates, and every graduate is college and career ready; key attributes include flexible pathways, personalization, work-based learning, dual-enrollment, virtual/blended learning and early college.

### **Artifact**

An object created by a learner as evidence of learning in order to make their thinking visible and display their knowledge.

### **Assessment**

A formative or summative evaluation of student performance which is meaningful, accurate and fair and is administered with the purpose of providing feedback on learning for both the teacher and student; summative assessments should be both reliable and valid.

### **Badging**

A digital badge is an online representation of a skill you have earned. Digital [badging](#) is an assessment and credentialing mechanism that is housed and managed online. Badges are designed to make visible and validate learning in both formal and informal settings, and hold the potential to help transform where and how learning is valued.

### **Benchmark**

A point of reference against which a learner's level of proficiency can be measured.

### **College, Career & Civic Life Framework for Social Studies State Standards**

The College, Career and Civic Life Framework ([C3](#)) is centered on an Inquiry Arc of compelling and supporting questions which provides structure for students to develop inquiries, apply disciplinary concepts, use evidence and evaluate sources to communicate conclusions and take informed action; content is determined locally.

### **Curriculum**

Curriculum refers to the lessons and academic content taught in a school or in a specific course or program. Depending on how broadly educators define or employ the term, curriculum typically refers to the materials, resources and learning experiences that will provide students with the opportunity to master the Standards they are expected to meet. This includes the units and lessons that teachers teach; the assignments and projects given to students; the books, materials, videos, presentations and readings used in a course; and the tests, assessments and other methods used to evaluate student learning.

## **Curriculum Guidelines**

Curriculum guidelines lay out best practices for curricula. In Vermont, guidelines are most frequently established by the Supervisory Union/District and provide parameters for teachers to plan within. Generally speaking, these guidelines will include, but are not limited to:

- a. Alignment to national/local standards
- b. Policy and rules about student groups
- c. A focus to ensure equity and access
- d. Criteria to determine quality curricula

## **Differentiated Instruction**

Instructional strategies designed to help students meet proficiency that is based on individual learning needs and styles. The learning goals are the same, yet the teacher provides choice and exercises flexibility in methods of support, feedback, assessment, grouping, and instruction to create the best learning experiences for all students.

## **Education Quality Standards**

The [Education Quality Standards](#) (EQS) are rules enacted to ensure that all learners in Vermont public schools are afforded educational opportunities that are substantially equal in quality, and enable them to achieve or exceed the standards approved by the State Board of Education.

## **Equity**

Equity requires that each and every learner has access to the knowledge, skills, and learning opportunities necessary to be contributing members of a rapidly changing global society, regardless of factors such as race, gender, sexual orientation, ethnic background, English proficiency, immigration status, socioeconomic status, or disability.

## **Evidence**

Evidence is used as an indicator to determine whether or not the student has met the standards of the curriculum at any level of decision making. Evidence includes statewide assessments of learning. Evidence may also serve as determinants in establishing proficiencies at the local level and graduation requirements. Evidence is used by teachers to make decisions related to student proficiency.

## **Evidence-Based**

[Evidence-based](#) refers to any concept or strategy that is derived from or informed by objective evidence—most commonly, educational research or metrics of school, teacher, and learner performance. Common applications include evidence-based decisions, evidence-based school improvement, and evidence-based instruction.

## **Feedback**

An instructional strategy that provides information to learners during the learning process in order to identify strengths and areas in need of improvement.

## Flexible Pathways

Any combination of high-quality expanded learning opportunities, including academic and experiential components, which build and assess attainment of identified proficiencies and lead to secondary school completion, civic engagement, and postsecondary readiness. Flexible pathways allow students to apply their knowledge and skills to tasks of personal interest as part of the personalized learning planning process.

## Formative Assessment

The use of [formative assessment](#) is an intentional practice by teachers to monitor progress, provide ongoing feedback, and modify instruction to meet the needs of learners. Learners use formative assessment to identify strengths as well as areas in need of improvement. Since the goal of formative assessment is to improve learning during the learning process, these assessments are not graded.

## Frameworks

A *Framework* is intended to connect inter-related core concepts for student learning in a variety of contexts. In some cases, a Framework may substitute for Standards. In order for a document to be considered a Framework it must:

- a. Provide conceptual understandings guiding student learning.
- b. Serve to facilitate conversations for creation of relevant learning outcomes.
- c. Include a demonstrated tie to the scholarship of teaching and learning.
- d. Be intended to evolve as research and practice develop.

## Learning Progressions

Learning progressions are pathways that describe developmental progressions towards proficiency in a specific domain.

## Learning Targets

[Learning targets](#) identify the goals for a lesson and are framed from a learner's perspective. They clarify what to learn, how deeply to learn it, and how to demonstrate evidence of new learning.

## Local Comprehensive Assessment System

A Local Comprehensive Assessment System (**LCAS**) is a coordinated and comprehensive system that assesses the standards approved by the State Board of Education; employs a balance of assessment types, including but not limited to, teacher-or learner-designed assessments, portfolios, performances, exhibitions and projects; includes both formative and summative assessments; enables decisions to be made about progression and graduation, including measuring proficiency-based learning; informs the development of Personalized Learning Plans and support; provides data that informs decisions regarding instruction, professional learning, and educational resources and curriculum; and reflects strategies and goals outlined in the district's Continuous Improvement Plan.

## National Core Arts Standards

The [National Core Arts Standards](#) (NCAS) are the preK-12 Fine Arts learning standards which include five arts disciplines: Visual Art, Theatre, Music, Dance, and Media Arts. The standards emphasize four artistic processes: creating, performing, responding and connecting.

## **National Health Education Standards**

[SHAPE](#) (Society of Health and Physical Education) America's National Health Education Standards (NHES) were developed to establish, promote and support health-enhancing behaviors for learners in all grade levels—from pre-Kindergarten through grade 12. The NHES provide a framework for teachers, administrators, and policy makers in designing or selecting curricula, allocating instructional resources, and assessing achievement and progress.

## **National Physical Education Standards**

[SHAPE](#) America's National Standards & Grade-Level Outcomes for K-12 Physical Education define what a learner should know and be able to do as result of a highly effective physical education program. States and local school districts across the country use the National Standards to develop or revise existing standards, frameworks and curricula. The goal of physical education is to develop physically literate individuals who have the knowledge, skills and confidence to enjoy a lifetime of healthful physical activity.

## **Next Generation Science Standards**

The [Next Generation Science Standards](#) (NGSS) are science standards adopted by Vermont that reflect what learners should know and be able to do in core ideas, scientific and engineering processes, and cross-cutting concepts.

## **Open Education Resource**

[Open educational resources](#) (OER) are freely accessible, openly licensed documents and media that are useful for teaching, learning, assessing and research.

## **Performance Assessment**

A performance assessment is any learning opportunity or assessment that asks learners to *perform* or demonstrate knowledge, understanding, or skills. Performance assessments yield a tangible product and/or performance that serves as evidence of learning. Performance assessments present situations that require learners to apply their learning to a new context and can be designed by the learner or teacher. Performance assessments are sometimes referred to as performance tasks.

## **Performance Indicators**

Performance indicators describe or define what learners need to know, understand, and/or be able to do to demonstrate proficiency related to standards. Performance indicators are measurable and allow learners to demonstrate proficiency over time.

## **Personalization**

A collaborative learning process built on an understanding that tapping into unique student interests, backgrounds, strengths, and needs drives student learning. Students, teachers, and the community work together to make this learning process rigorous, relevant, and authentic.

## **Personalized Learning Plan**

A [Personalized Learning Plan](#) (PLP) is developed on behalf of a student by the student, a representative of the school, and, if the student is a minor, the student's parents or legal guardian, and updated at least annually. The plan shall be developmentally appropriate and shall reflect the student's emerging abilities, aspirations, interests and dispositions. Beginning no later than in the seventh grade, the plan shall define the scope and rigor of academic and experiential opportunities necessary for the student to successfully complete secondary school and attain college and career readiness.

## **Proficient**

Proficient means that a learner has demonstrated competence in relation to knowledge and/or a set of skills related to identified standards.

## **Proficiencies**

Proficiencies include explicit, measurable, learning objectives based on standards and measure a learner's knowledge and skill demonstrated in a consistent manner, in various settings over time. Proficiencies are also referred to as competencies.

## **Portfolio**

A learner's portfolio is a compilation of academic work and other forms of educational evidence assembled for the purpose of evaluating coursework quality, learning progress, and academic achievement; determining whether the learner has met standards; helping the learner reflect on their academic goals; and creating an archive of academic work.

## **Proficiency-Based Education**

Proficiency-based education is a standards-based system of instruction, assessment, and reporting that requires learners to demonstrate competence in targeted knowledge, skills, and/or abilities before moving onto the next level or challenge. Proficiency-based education may also be referred to as mastery or competency-based education.

## **Proficiency-Based Learning**

[Proficiency-Based Learning](#) (PBL) is any system of academic instruction, assessment, and reporting that is based on learners demonstrating proficiency in knowledge, skills, and abilities they are expected to learn before progressing to the next level or challenge. Proficiency-based learning may also be referred to as mastery or competency-based learning.

## **Proficiency-Based Reporting**

[Proficiency-based reporting](#) systems require clear expectations for what will be learned; a shared understanding of the depth of learning necessary to demonstrate proficiency; strategies for documenting and reporting learning over time; a transparent method of communicating with learners, parents, and guardians where learners are along a continuum; and opportunities, when necessary, for learners to retake assessments in order to progress towards proficiency.

## Project-Based Learning

[Project-based learning](#) is an approach to education in which learners explore real-world problems and challenges to address learning targets.

## Proficiency-Based Graduation Requirements

[Proficiency-Based Graduation Requirements](#) (PBGRs) are the locally-delineated set of content knowledge and transferable skills connected to state standards that, when supplemented with any additional locally-developed requirements, have been determined to qualify a student for earning a high school diploma.

## Proficiency Scales

A criterion-based assessment tool that is task neutral and includes explicit performance expectations for each possible rating.

## Rubric

An evaluation tool used to assess performance against a set of criteria. Rubrics clearly define academic expectations for learners and help to ensure consistency in the evaluation of academic work from learner to learner, assignment to assignment, or course to course.

## Scoring Criteria

Criteria that define what you will look for in a learner's response to determine whether or not they are progressing towards meeting a learning target(s).

## Self-Assessment

Self-assessment includes the comparison of one's own performance against established criteria, change in performance over time, and/or a description of current performance. Learners are given the opportunity to identify areas for improvement and revise accordingly. Self-assessment can promote learning if it is used while the learning is taking place.

## Single Point Rubric

A [single point rubric](#) allows for critical analysis of a performance to determine which criteria have been met as well as those that require additional work. A single point rubric breaks down the components of an assignment, but only describes the criteria for proficiency. Performances that exceed proficient provide evidence that expands upon proficient.

## Standards

Standards identify the *essential knowledge, skills and behaviors* that should be taught and learned in school.

- a. *Essential knowledge* is what students should know. It includes the most important and enduring ideas, issues, dilemmas, principles and concepts from the disciplines.
- b. *Essential skills* are what the students should be able to do. Skills are ways of thinking, working, communicating and investigating.
- c. *Essential behaviors* identify the behaviors related to success in and outside of school. These include (but are not limited to) providing evidence to back up assertions and developing productive, satisfying relationships with others.

## **Standards-Based Grading**

[Standards-based grading](#) systems involve measuring learners' achievement level in relation to well-defined learning targets. Both letter grades and grade point averages are still reported. Some overlap exists between proficiency-based reporting and standards-based grading, but there are also some significant differences.

## **Summative Assessment**

An assessment that is used to evaluate the degree of learning, skill acquisition, and academic achievement at the conclusion of a defined instructional period—typically at the end of a project, unit, course, semester, program, or school year. The assessment results are reported and are evaluative, rather than diagnostic.

## **Transferable Skills**

[Transferable skills](#) are a broad set of knowledge, skills, and abilities that are believed to be critically important to success in today's world, particularly in collegiate programs and modern careers. Transferable skills include communication, collaboration, creativity, innovation, inquiry, problem solving and the use of technology.
